

# **SHOW MASTER**

## Supports the energy metabolism

### **Characteristics**

Complementary feed for horses and ponies.

Prequine Show Master is a carefully formulated product, produced according to GMP+FSA quality guidelines. Prequine Show Master contains among others Adenosine triphosphate (ATP), the primary carrier of chemical energy and main energy source for metabolic processes. To further support this metabolic energy process: glycine, arginine and methionine are added, out of which the body makes creatine, that is used for storage of fast energy in the muscles. Prequine Show Master also contains L-carnitine and L-lysine which are essential amino acids, required for oxidation of fatty acids for energy production. B-vitamins are also added as they support the energy metabolism by activating the enzymes involved in this process.

#### **Directions for use**

Horses: 1 injector (50 g) given orally 1 day before competing /

intensive training session / show.

Repeat 4-6 hours before competing / intensive

training session / show.

Ponies: Half of the above-mentioned quantities.

#### Storage

Store dark and dry at 15-25°C.

Keep out of sight and reach of children.

#### **Presentation**

50 g oral injector.

#### Shelf life

3 years from manufacturing date (MFD).

#### Composition

#### Contains per 50 g:

Adenosine Triphosphate disodium salt (ATP) 3.000 mg, Propylene glycol, Sodium benzoate.

### Feed additives per 50 g:

Amino acids: 3c301, DL-methionine, technically pure, 500 mg; 3c322, L-Lysine monohydrochloride, technically pure, 400 mg; 3c362, L-arginine, 500 mg; 3c371, L-valine, 400 mg.

Vitamins: 3a911, L-carnitine L-tartrate (LCLT), 3.000 mg; 3a826, Vitamin B2, 10 mg; 3a841, Calcium-D-pantothenate, 200 mg; 3a835,

Vitamin B12, 200 μg.

Flavouring: 2b17034, Glycine, 500 mg; 2b17005, L-Aspartic acid, 400 mg.
