

## Horse-side results for Horse-side decisions

**No refrigeration required**  
Store at room temperature

**Objective results**  
Reader interprets & displays results

Measuring IgG level is a vital component of any exam for both sick and outwardly healthy neonatal foals. The VMRD **Foal IgG** test makes this easy for equine veterinarians, offering room temperature storage and results that are interpreted by the same reader as VMRD SAA!

## Multiple tests, one handheld reader - now with RECHARGEABLE battery!

- ✓ Ideal size with convenient storage case
- ✓ Calibration for accuracy & consistency
- ✓ Will not lose your results
- ✓ Automatically reads test results at 10 minutes
